To: opnfv-enduser-advisory-group@lists.opnfv.org

- Attendees (from EUAG): Don, Serge, Tetsuya, Morgan, Fu Qiao
- Minutes approved
- Morgan provided a quick update from the Plugfest
- EUAG overview
 - Don noted that a small number of service providers are involved in the weeds from the MSO and getting experience from OPNFV deployment & usage. Expect more to step forward
 - Serge noted that his focus has been on near-term deployment and looking for interoperability & convergence in the industry
- Tracking progress on the pain points discussion (esp. top 3 pain points)
 - Reference VNF: There was a good discussion on the SampleVNF project
 - VNF on-boarding: There are several projects such as Models and OPNFV Testing projects addressing this pain point
 - Documentations: There is a breakout session planning during the Beijing Summit
 - There was a discussion that it'd be good to include business drivers in the the pain points
