

ONS 2017 Hackathon

Projects

- **Documentation**
 - **ODL documentation led by ODL experts**
 - Expert: Charles Eckel (eckelcu) <eckelcu@cisco.com>: Documentation lead on Unimgr, and able to help a bit with getting started with ODL
 - **Idea-a-Thon: produce solution briefs**
- **Interoperability of Orchestrators Across Controllers**
 - **Open source and vendor specific allowed**
 - **Several specific combinations will be available as a starting point or bring your own!**
 - Expert: Ignas Bagdonas <ibagдона.ietf@gmail.com>: BGP related - ODL BGP implementation and its subcomponents, for BGP-LS in particular, and SFC related components too.
- **OPNFV Solutions**
 - **Running Functest against OpenStack XCI**
 - Get ODNFV Functest running against existing/predeployed bifrost/openstack-ansible virtual os-nosdn-nofeature-noha scenario (1 controller/1 compute)
 - Expert: Fatih Degirmenci <fatih.degirmenci@ericsson.com>: ODNFV guru
 - **ODL Autorelease for XCI**
 - Work on ODL distro for ODNFV to make consuming ODL in ODNFV faster
 - Expert: Fatih Degirmenci <fatih.degirmenci@ericsson.com>: ODNFV guru
 - **Bring ODL CSIT tests into ODNFV for XCI**
 - Expert: Fatih Degirmenci <fatih.degirmenci@ericsson.com>: ODNFV guru
- **VNF on ONAP**
- **Apps on OpenSwitch (OPX Base)**
