

# Apex

## Apex :: OPNFV installer

Project Apex is an OPNFV Installation and Deployment tool based on the RDO Project's Triple-O OpenStack installation tool. Triple-O is an image based life cycle deployment tool that is a member of the OpenStack Big Tent Governance.

- RDO Project: <http://www.rdoproject.org>
- OpenStack Triple-O: <https://wiki.openstack.org/wiki/TripleO>

### Installation guide:

<http://docs.opnfv.org/en/stable-danube/submodules/apex/docs/release/installation/index.html#apex-installation>
