It has been agreed to use simpler naming convention of testcases in result DB/dashboard. It means, that original TC name from VSPERF framework will be suffixed with lower case form of vSwitch used in the test.

Examples:

1) phy2phy_cont & OvsVanilla => phy2phy_cont_ovsvanilla
2) phy2phy_tput & OvsDpdkVhost => phy2phy_tput_ovsdpdkvhost
3) phy2phy_back2back_vpp & VppDpdkVhost (this test can be used only with VPP) => phy2phy_back2back_vpp_vppdpdkvhost
