

# Template

## Project Name:

- Proposed name for the project: `projectname`
- Proposed name for the repository: `reponame`

## Project description:

- Provide high level description of intended project and OPNFV use case and benefit, if needed.
- Include any architecture diagrams or specifications, reference to OPNFV requirements list.

## Scope:

- Describe the problem being solved by project
- Specify any interface/API specification proposed,
- Specify testing and integration:
  - Debugging and Tracing
  - Unit/Integration Test plans
  - Client tools developed for status shows etc.
- Identify a list of features and functionality will be developed.
- Identify what is in or out of scope. So during the development phase, it helps reduce discussion.
- Describe how the project is extensible in future

## Testability:

- Specify testing and integration like interoperability, scalability, high availability
- What QA and test resources will be available?

## Documentation:

- API Docs
- Functional block description

## Dependencies:

- Identify similar projects is underway or being proposed in OPNFV or upstream project
- Identify any open source upstream projects and release timeline.
- Identify any specific development be staged with respect to the upstream project and releases.
- Are there any external fora or standard development organization dependencies. If possible, list and informative and normative reference specifications.
- If project is an integration and test, identify hardware dependency.

## Committers and Contributors:

- Names and affiliations of the committers
- Names and affiliations of any other contributors

## Planned deliverables:

- Described the project release package as OPNFV or open source upstream projects.
- If project deliverables have multiple dependencies across other project categories, described linkage of the deliverables.

## Proposed Release Schedule:

- When is the first release planned?
- Will this align with the current release cadence

Use the above information to create a key project facts section on your project page

## Key Project Facts

**Project Name:** Project Name (repo name)

**Repo name:**

**Lifecycle State:**

**Primary Contact:**

**Project Lead:**

**Jira Project Name:** Same as Project name

**Jira Project Prefix:** [10 Characters max [A-Z] ]

**mailing list tag** [Should match Jira Project Prefix]

**Committers:**

foo@bar.com

baz@qux.com
