

TC Agenda 20201109

Agenda:

- Gating of release artifacts
- Release manifest - how to handle self-releasing projects

Minutes:

- Gating of release artifacts ([Mark Beierl](#))
 - Jerma is the last release of OPNFV
 - we need to differentiate between Jerma and Anuket
 - what are the gating criteria for Airship?
 - RC-1 compliance?
 - Functest healthcheck - like in the previous years
 - do we need a stable release tag of Functest to gate our release?
 - Functest releases are gated internally, yet the released containers get regularly updated
- Release manifest - how to handle self-releasing projects
 - this is a Anuket-related discussion

Actions:

- Al Morton Many performance testing tools require DPDK. What is AIRSHIP's status on DPDK support? ANSWER: AIRPSHIP 1.8 supports a version of DPDK.
